Directors Office**To:** Vickers Charles R. (DNREC)**Subject:** SRA Maps - Kent County Parcel No. LC-00-05800-02-4700-00001

Mr. Vickers-

I wanted to address you and the Department regarding the proposed State Resource Area Maps and the proposed SRA on my property (Kent County Parcel No. LC-00-05800-02-4700-00001) located east of Dover. I have reviewed the proposed maps as well as the presentation materials provided on the DNREC website.

While I have to say that I am impressed with the concept of protecting valuable resource areas as depicted in your presentation materials (scenic sites with families hiking, ponds with waterfowl, etc.) the area that you have identified on my property and surrounding properties is woods. Just plain woods. It sure does not look like the areas that you have depicted in your presentations.

I have to say that I think you are deceiving the public to indicate to them that you are saving significant State Resources, while in fact you are just trying to keep people out of the woods. Of course the State is also trying to keep people out of the wetlands, and the agricultural lands.

I hope that the State takes a step back and proposes new Resource areas that really are significant resources to be saved, and realizes that, while I don't plan on doing anything to my woods, they are my woods not a significant State Resource. I think efforts to include areas for protection that are not of the highest quality waters down the intent of the program and may truly endanger your plan to protect the truly deserving property.

Thank you for the opportunity to address you on this matter.
